ABOUT THE CONCLAVE

The legal & regulatory, and corporate governance frameworks in India are set for a radical change, one of its most significant transformations in decades. Accelerated digitization, the expansion of global value chains, new-age business models, and rising expectations of accountability have reshaped business landscape, and have also changed the way legal leaders have to respond and rethink on their strategies. Moreover, the emergence of areas such as AI governance, digital competition law, ESG obligations, cross-border data flows, fintech compliance, cyber resilience, and evolving global standards continue to add new dimensions of complexity.

ASSOCHAM's 2nd Bharat Legal Conclave 2026 is intended to be a flagship national forum for high-impact dialogues and policy-oriented discussions besides sharing capabilities for institutional resilience and building the legal ecosystem, which is supportive of India's economic ambitions in the digital era.

The deliberations will delve into various aspects of technology regulation, data governance, cyber law, AI and IP, workforce regulation, ESG and corporate governance, digital business compliance, contracting, and global dispute management. This will eventually lead to the participants being able to craft a legally sound landscape that will be future-ready, innovation-friendly, and ethically grounded for India.

The conclave brings together General Counsels, policymakers, regulators, legal innovators, industry leaders, law firms, compliance strategists, and governance experts to address these challenges collectively.
