Governance Encompass: Steering Corporate Accountability

"Building Trust with ESG-Driven Financial Disclosures"

Thursday 21st Aug 2025 | New Delhi, India

About the Conference

In the evolving landscape of corporate accountability, financial reporting has emerged as a pivotal tool for driving Environmental, Social, and Governance (ESG) leadership and fostering robust corporate governance.

Robust financial reporting frameworks provide companies with a strategic advantage by addressing investor demands for sustainability-oriented disclosures. These frameworks encourage businesses to adopt sustainable solutions and practices that resonate with growing demands for corporate governance.

Furthermore, they mitigate risks such as greenwashing, reputational damage, supply chain vulnerabilities, regulatory non-compliance, and mismanagement of social equity initiatives. By operationalizing ESG goals, companies can ensure that growth is not only profitable but also environmentally and socially responsible.

The ASSOCHAM International Conference on "Governance Encompass: Steering Corporate Accountability" will convene global leaders, policymakers, investors, and innovators to discuss how financial reporting can be leveraged to build trust and drive ESG leadership. The event will also explore cutting-edge technologies, investment strategies, and regulatory frameworks shaping the future of sustainable business.
