INDIA MINES & MINERALS CONCLAVE

*Shaping Transformation Through Policy Reforms,
Sustainability & Strategic Security*

 13 March 2026,

 Bhubaneswar, Odisha

The mining and minerals sector is a key part of India's economic growth. It supplies important raw materials for infrastructure, manufacturing, energy, and new technology sectors. As the country aims to become a USD 5 trillion economy, a strong, efficient, and sustainable mining sector is increasingly essential. In recent years, the sector has seen many policy and regulatory changes aimed at improving transparency, encouraging private involvement, making business easier, and promoting sustainable mining practices. At the same time, the global shift toward clean energy, electric vehicles, and digital technologies has led to a sharp rise in demand for critical minerals like lithium, cobalt, nickel, and rare earth elements. These shifts bring both opportunities and challenges for India's mining landscape.

The mining sector exists at the crossroads of economic growth, environmental care,

social responsibility, and technological progress. While India has made good strides in mineral auctions, production capacity, and regulatory changes, issues still exist in areas like exploration efforts, value addition, use of modern technologies, environmental management, and community involvement.

The India Mines and Minerals Conclave aim to tackle these problems by promoting discussions among key stakeholders. The conclave will let policymakers share views on current and planned reforms, give industry leaders a chance to discuss operational realities and investment needs, and provide a space for technology providers and researchers to present innovative solutions. By gathering various stakeholders in one place, the conclave seeks to match national priorities with global best practices.

KEY AREAS OF DISCUSSIONS

- Policy, Governance & Ease of Doing Business in Mining
- **Strategic Role of Mining & Minerals:** Contribution to Industrial Growth and Infrastructures in state.
- Rationalize the royalty rate and measures to promote beneficiation of low-grade Iron Ore
- **Critical & Rare Minerals:** Supply chain resilience and role in energy transition minerals
- **Sustainable & Green Mining:** ESG integration and environmental stewardship
- Improving transportation, connectivity, and logistics for minerals to aid mining operations and exports.
- **Digital Transformation:** AI, automation, drones, and smart mining

SILENT FEATURES

- 01** Leaders from Government, Regulatory & Industry as Speakers and Delegates
- 02** Special Address
- 03** Interactive Panel Discussion Sessions
- 04** Excellent Branding and Networking Sessions
- 05** B2B Meetings
- 06** Media Coverage
- 07** Release of Knowledge Report
- 08** **200 +** Paid Delegates
- 09** **30 +** Speakers

Glimpses of Previous Metals & Mining Conference
