

# GLOBAL TEXTILE SUSTAINABILITY SUMMIT

Make India Sustainable  
Textile Hub

4 September 2024 | New Delhi

# GLOBAL TEXTILE SUSTAINABILITY SUMMIT

## Make India Sustainable Textile Hub

4 September 2024 | New Delhi

*The Indian textile industry is one of the largest in the world, encompassing a wide range of segments from traditional handlooms to modern textile mills. India's diverse textile heritage, and competitive advantage in raw material availability, position it as a global textile powerhouse.*

Positioning India as a sustainable textile hub is not just a strategic imperative but also an ethical commitment in response to the pressing global challenges of environmental degradation and social inequality. India's rich textile heritage, coupled with its favourable government policies and vibrant textile ecosystem, lays a strong foundation for this endeavour.

By embracing sustainability as a guiding principle, India has the opportunity to not only transform its textile sector but also to lead by example on the global stage. This entails embracing innovative technologies, promoting ethical sourcing practices, and fostering collaboration among stakeholders to create a more sustainable and equitable textile ecosystem.

In view of the above, ASSOCHAM has taken the initiative to organize Global Textile Sustainability Summit under the central theme "Making India a Sustainable Textile Hub" on 3<sup>rd</sup> September 2024 | New Delhi. By focusing on the theme of making India a sustainable textile hub and showcasing the potential of PM Mitra Parks, the summit aims to pave the way for a brighter and more sustainable future for the textile sector.

The Summit aims to bring together industry leaders, policymakers, investors, and stakeholders to explore the potential of PM Mitra Parks in India as a sustainable textile hub. With a focus on promoting sustainable practices and fostering growth in the textile sector, the summit will serve as a platform for showcasing the immense opportunities for textile investments in India.

**The sustainable fashion market in India is estimated to reach \$9 billion by 2025.**

## Key Focus Areas

Eco-Friendly Fibers

Smart Textiles

Biodegradable Textiles

Sustainable Fashion

Circular Economy

Ethical Supply Chains

Green Manufacturing

Global Standards

## Key Topics of Discussion

Vision for 2030:  
Strategic goals for  
sustainability in the  
textile sector

Global Trends in  
Sustainable Textiles:  
Insights from international  
perspectives

Innovations in  
sustainable materials  
and processes

Role of technology  
in reducing  
environmental impact

Best practices  
in ethical sourcing  
and procurement

Tools and techniques  
for supply chain  
transparency

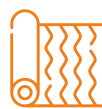

Potential of PM Mitra  
Parks in fostering  
sustainable practices

Investment opportunities  
and incentives for  
sustainable development

Building partnerships  
between stakeholders

Role of academia  
and research in  
supporting industry

Community  
engagement and social  
responsibility initiatives

## Glimpses of last year's events
